

ITS - Inventory Tracking Software

This Visual dBase for Windows application allows you to track inventory from order placement to product shipments. The full relational database gives users control and flexibility of vendor, customer and inventory tracking. Utilizing bar code technology, **ITS** allows for total accounting of inventory movement, from receipt to shipping. ITS offers inventory control, bar code printing, and portable data collection all in one package.

ITS comes packed with features and options that include:

- * Bar code printing
- * Warehouse/Location fields
- * Portable Data Collection
- * Reorder and replenishment fields
- * Vendor & Customer Maintenance
 - * Multiple vendor ID's
 - * Product Maintenance
 - * Item and SKU fields
 - * Networking
- * Windows 98, 2000, XP, and fully ODBC Compliant
